

The SANDMAN STORY

EAT MOUSE'S ESCAPE

M

The mouse's escape from the sandman's grasp was a feat of agility and speed that has never been equaled before. The mouse, a small, brown creature with a long tail, was seen running across the sand dunes at a breakneck pace. The sandman, a large, dark figure with a long, flowing robe, was seen chasing the mouse with a long, thin stick. The mouse's escape was a feat of agility and speed that has never been equaled before.

The mouse's escape from the sandman's grasp was a feat of agility and speed that has never been equaled before.

EARLY WINKLES

There is a certain charm about a woman who winks early. It is a sign of youth and vitality, and it is a sign of a woman who is not afraid to show her personality. A woman who winks early is a woman who is confident and self-assured. She is a woman who is not afraid to be different and to stand out from the crowd.

Early Winkers May Mean Youth

The early wink is a sign of youth and vitality. It is a sign of a woman who is not afraid to show her personality. A woman who winks early is a woman who is confident and self-assured. She is a woman who is not afraid to be different and to stand out from the crowd.

PARASITES CAUSE BIG LOSS

Injury From Parasites Is Greatest Among Lambs and Young Sheep—Ways to Prevent Diseases

Parasites are the most common cause of disease and death in young livestock. They are small, invisible creatures that live on the skin and in the internal organs of the animal. They cause a variety of symptoms, including itching, swelling, and loss of appetite. If left untreated, they can lead to death.

There are several ways to prevent parasites. One way is to keep the animal clean and dry. Another way is to use a good quality feed. A third way is to use a good quality medicine. It is important to consult with a veterinarian if you suspect your animal has parasites.

Parasites are a serious problem for livestock owners. They can cause a lot of trouble and expense. It is important to take steps to prevent parasites and to treat them if they do appear. This will help to keep your livestock healthy and happy.

Where Pasture Is Abundant Sheep Need No Other Food

Sheep are hardy animals that can thrive on a diet of grass and hay. They are able to digest a wide variety of plant material, and they are able to find food on their own. This makes them a very valuable asset to any farm or ranch.

Sheep are also very intelligent animals. They are able to learn from experience, and they are able to communicate with each other. This makes them a very interesting and enjoyable animal to keep.

FULL VALUE OF BUTTERMILK

Particularly Advantageous When Fed in Connection With Corn or Other Feeds

Buttermilk is a very nutritious and healthy food. It is a by-product of the dairy industry, and it is often discarded. However, it is a very valuable food that can be used in a variety of ways. It can be fed to livestock, or it can be used in human food.

Illinois Central System Makes an Appeal to Shippers and Consignees

The Illinois Central System has made an appeal to shippers and consignees. It has offered a variety of services and rates that are designed to make shipping easier and cheaper. This is a very important move for the system, and it is one that we hope will be well-received by the shipping industry.

1936	\$ 21,116,000

FREEDOM

How Many More Will Be Freed?

There are many people who are still in slavery. They are people who have been bought and sold like property. They are people who have no freedom and no rights. It is time that we take action to free them. We must demand that they be treated as human beings, and we must demand that they be given the same rights and freedoms that we all have.
